Date Ad Started: February 14, 2018 **Expires:** May 14, 2018

Assistant/Associate Professor

The School of Health Sciences and Practice (SHSP) at New York Medical College invites applications for a full-time faculty position at the rank of Assistant or Associate Professor, contingent upon the qualifications of the candidate. Experienced faculty with a record of teaching and scholarship are preferred. However, recent graduates of research-based doctoral degree programs will be considered, as will be DPT prepared candidates with recognition by ABPTS as a clinical specialist in an area of expertise and evidence of the capacity to develop a scholarly agenda.

Two areas of teaching and scholarship are a priority:

- 1) teaching coursework in research methodology and coordinating DPT doctoral project scholarship, or
- 2) teaching and coordinating problem-based learning coursework in cardiopulmonary and acute care clinical practice.

Additional responsibilities include program administrative activities and service consistent with the college's mission. Research opportunities exist to collaborate with faculty in other departments within the School of Health Sciences and Practice, and within the School of Medicine and School of Basic Medical Science. Local clinical sites and institutions with which the program collaborates include Westchester Medical Center, Blythedale Children's Hospital, and Burke Rehabilitation Hospital. This is a full-time, 12-month faculty position with competitive salary and benefits package.

Minimum qualifications include:

- A professional degree in physical therapy and either a research-based doctoral degree or a clinical doctoral degree with ABPTS clinical specialist certification and evidence of a scholarly capacity.
- An active scholarly agenda and record of publication and grant-supported scholarship is preferred.
- Eligibility for New York State licensure as a physical therapist.

Description:

- Strong interest in student mentoring and demonstrated experience in teaching.
- Dedication to professional and community service.

The Department of Physical Therapy curriculum integrates traditional coursework in the foundational sciences with problem-based learning (PBL) coursework in clinical sciences. A unique emphasis is placed on the roles physical therapy plays in public health; the program is proud to have been one of the first in the nation to offer a DPT/MPH dual degree option. Faculty scholarship in areas of clinical research, teaching, and public health serve as the springboard for student group doctoral projects.

New York Medical College is strategically located on a suburban NY campus in the intellectually vibrant northeast corridor close to the cultural and scientific resources of New York City. This location enhances the educational and research opportunities afforded by the region's diversity and the College's historic and broad involvement with socially, economically, and ethnically diverse populations. New York Medical College, founded in 1860, is one of the nation's oldest private medical and health sciences educational institutions and the first U.S. medical school to accept female students. Since 2011, the College has been a member of the Touro College and University System. Send a letter of interest, curriculum vitae, and contact information for three references to:
