Expires: August 15, 2020

Whitworth University's Doctor of Physical Therapy Program invites applications and nominations for multiple 12-month tenure-track and non-tenure-track faculty positions to join its founding DPT faculty. Our program is avidly preparing to submit an Application for Candidacy to CAPTE in Fall 2021. The DPT program/faculty is in the process of creating an innovative learner-centered curriculum design, rich in evidence-based practice, interprofessional learning experiences and community clinical partnerships. The program will prepare DPT graduates with the leadership, professional and clinical competencies, and moral courage to collaboratively lead health teams and be effective movement system experts in the promotion of health of individuals, communities, and our diverse society. The selected candidates will join a group of core faculty members over the next few years whose collective expertise will comprise needed DPT curriculum content areas. Faculty will engage in scholarly opportunities that contribute to the advancement of the profession and create innovative learner-centered delivery models that provide education excellence and meet national accreditation standards for Doctor of Physical Therapy education. The University is interested in expanding its graduate health program portfolio; to that end, it is investing in a state of the art new building to house teaching and research that includes a motion analysis research lab, exercise physiology labs, anatomy lab, simulation labs, dedicated classroom and functional lab spaces to support the unique needs of each of its health programs. The new facilities will reflect the institutional commitments to quality, faculty, student and staff support, accessibility, and environmental sustainability.

Interested candidates may review the job description and apply at <https://www.whitworth.edu/faculty-positions>
