Expires: September 6, 2020

The Doctor of Physical Therapy program is accepting applications for a full-time, 12-month core faculty member to join our dynamic and collaborative team. Application reviews will begin immediately and continue until the position is filled. Rank is commensurate with experience and credentials.

The Baylor DPT program is an innovative and accelerated (2-year) program that uses a hybrid learning curricular model. Best practices in online instruction, hands-on lab immersion instruction, and structured clinical education are used to deliver quality interactive learning experiences for DPT students.

Baylor University is a private Christian university and a nationally ranked research institution, consistently listed with highest honors among The Chronicle of Higher Education's "Great Colleges to Work For." The University is recruiting new faculty with a deep commitment to excellence in teaching, research and scholarship. Baylor seeks faculty who share in our aspiration to become a tier one research institution while strengthening our distinctive Christian mission as described in our strategic vision, Pro Futuris, and academic strategic plan, Illuminate. As the world's largest Baptist University, Baylor offers over 40 doctoral programs and has more than 17,000 students from all 50 states and more than 85 countries.

Responsibilities for this faculty position include teaching graduate-level DPT courses, student advisement/coaching, program and University service, and scholarship. Residence in Texas is not required as long as the faculty member is willing to travel for onsite labs. Neurologic, cardiopulmonary, and/or healthcare education simulation expertise is preferred, but not required. The successful candidate will prepare/revise asynchronous instructional materials (recorded lectures), prepare and lead weekly synchronous sessions (live, web-based classes), and develop and lead onsite lab immersion instruction. The successful candidate will demonstrate a focused research agenda; engage in collaborative research with existing faculty members, institutional partners, and/or other researchers within the profession; and support their research endeavors with intramural and/or extramural funding. The successful candidate will actively contribute to the missions of the Doctor of Physical Therapy Program, Robbins College of Health and Human Sciences, and Baylor University; engage in departmental, university, and professional service; and work effectively with faculty, staff, and students from diverse backgrounds.

**Required Qualifications:** Applicants must be licensed or eligible for physical therapist licensure in Texas or their state of residence. A Doctorate or Master's in Physical Therapy *and* terminal doctorate (e.g. PhD, DSc, EdD) in a related discipline is required. Applicants must be active in research within their area of specialization, and active in professional activities at local, state, and/or national levels.

**Preferred Qualifications:** Special consideration will be given to candidates who demonstrate a strong teaching background in neurologic or cardiopulmonary physical therapy, although other areas of expertise will be considered. Previous university-level teaching experience is highly desirable, especially with hybrid, online, or "flipped" educational formats. A well-established scholarly agenda and strong publication record are also preferred. Preference will additionally be given to applicants whose philosophy is compatible with the DPT program's mission to provide an innovative, career-focused, and Christian-valued education and the University's mission to be a world-class institution dedicated to Christian principles and ideals.

Applications MUST be submitted online by going to: <https://apply.interfolio.com/77551>. Inquiries regarding the position may be directed to Dr. Shane Koppenhaver @ [shane\\_koppenhaver@baylor.edu](mailto:shane_koppenhaver@baylor.edu) or 210-722-3671.
