

Kessler Neurologic Physical Therapy Residency
Kimberly Miczak
miczakk@einstein.edu

What is noteworthy about the mentor training program of Kessler is the consistency with which the program strives to train mentors and keep them communicating about the progress of the resident. At annual faculty meetings, experienced mentors bring case scenarios to collaboratively discuss how residents are performing related to program expectations. Mentors also meet quarterly to discuss resident performance and receive feedback. Mentor Training Overview provides a description of the ongoing mentor training activities. PPT from the Mentor training workshop includes expectations of the mentor before and during mentoring, a description of the 5 Microskills and how they can be applied in mentoring, and common pitfalls of mentoring.
