

Kaiser Permanente Neurologic Physical Therapy Residency
Arlene McCarthy
arlene.McCarthy@kp.org

Overview:

Kaiser Permanente has a long-term mission, vision and strategic priority to provide community service to its local communities and nationally. The project facilitates the engagement of the PT Residents in the local community and builds leadership skills through the process of designing and implementing the project with the assistance of faculty. Most important, the program fosters a 'culture' of service and leadership that goes beyond the residency program year. The program has provided a description of the community service project design and implementation along with the residents' reflection on their professional development.
