

University of Pittsburg Medical Center Rehab Services Orthopaedic PT Residency
Keelan Enseki
ensekikr@upmc.edu

Overview:

Early on in the residency, each resident attends a “Primer/Crucial Conversation” activity. It is a 1 – 3 hour talk/discussion (in person) that is held within the first month of residency. It is led and taught by an accomplished leader within the organization. They choose someone who is usually a clinician and has made a large impact in the field. See document describing the development of this learning activity.
